QSL Bridge from USA to EU: cheap and easy

Acting as a wormhole, gateway, or whatever you want to call it, the **EuroBureauQSL** has opened an special *entry point* in USA, where American hams can send their QSLs to **EURAO** members abroad (no matter where they are) for just the price of a national stamp. That's it.

It is like another *Outgoing QSL Service*, but, instead of paying the puddle jumping the senders, with their ARRL membership, the recipients do so through **EURAO**.

Thanks to **W2EN, Doug**, QSL Manager, this new entry point is up and running. Please, try it. (address behind)
